Class Photos

for Ahwatukee Campus - Friday, September 13th

for Chandler Campus - Friday, September 20th

We are very excited to have Bruce Yeung taking our individual and class photos this year. The photos will be taken at the school.

More information about packages and pricing will be emailed to the parents soon.

Please, have your children on campus grounds by 8:30/9 am.

Please, get your child at school on time and looking lovely.

Both class & individual photos will be taken.

Our After School Programs are offered at both campuses.

Having fun and learning with:

JumpBunch Class

Dance Class

Spanish After School Class

Computer Class

For sign up and more information contact the front office at each campus.

Little bit more about our computer class:

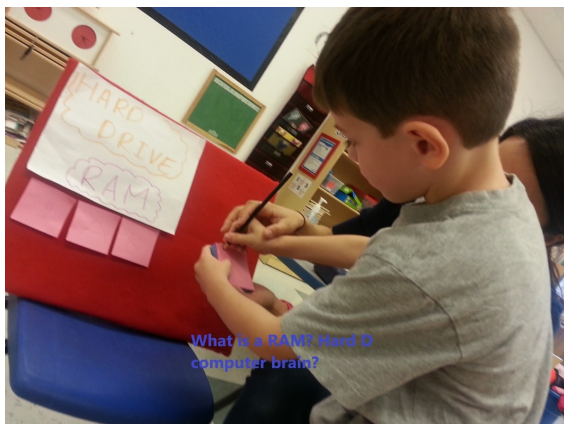

Get your child on the right track for first and second grade. This class helps students with basic computer knowledge and getting them ready for computer tests and doing homework. Screen time is only 20 min (40 min. class) \$49.

Puterbugs software is exclusively designed to teach young children everything from using basic mouse, keyboard, and navigational skills to more advanced mobile concepts, such as networks, satellites, cell phones, hotspots, wireless, email and the Internet.

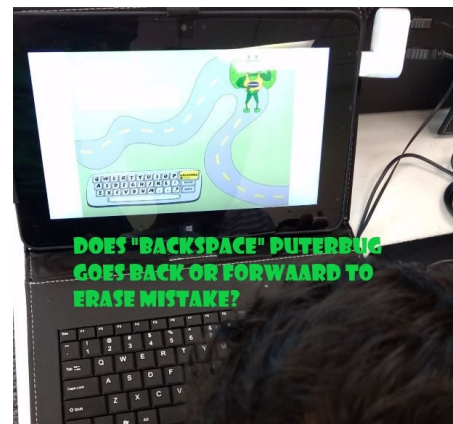

Puterbugs empowers children with the skills and attitude they need for a successful future. We accomplish this by teaching kids to apply the powerful uses of today's technology in creative and meaningful ways.

During a Puterbugs class, children become computer detectives on a learning adventure to imaginative places, such as email trail or internet island. Children work on their own laptops, provided by Future Kiddie, using adaptive software and website content to provide individualized learning. Every child moves ahead at his or her own pace! Children unleash creativity and imagination, enhance early reading and writing skills, and of course, learn to use the power of today's technology as a meaningful tool.

The result is more than just a class. Each lesson is designed by educational experts to deliver high quality, integrated enrichment experience aligned with the common core standards, S.T.E.M. skills, and NETS standards. Puterbugs is a positive learning experience that not only boosts computer and literacy skills, but also builds self-confidence in an environment where every child is successful. The ONLY enrichment program to introduce young children to important S.T.E.M. (Science, Technology, Engineering and Math) skills all while learning problem solving, creativity, early keyboarding skills, mouse skills, social studies, and so much more.

What is a RAM? Hard D
computer brain?
